Academic year in Indiana, USA

SUMMARY

Data analyst with almost six years at a currency risk management consultancy, where I own the team's technical and data side: Power BI dashboards, Excel models, Python automation of market data collection and processing, the corporate website and internal tools. Strong technical background (Master's in Big Data & Business Analytics, Systems Administration and Web Development degrees) and daily use of generative AI for analysis, writing and development. Fluent English. Looking for a remote data, BI or automation role.

EXPERIENCE

Data & Technical Support Analyst

2020-10 – Present

OMEGA IGF / METIX Gestión de Riesgos · Madrid

- Design and maintenance of Power BI dashboards and advanced Excel models to track market data and commercial activity.
- Python automation of market data collection, transformation and presentation (FX, interest rates, commodities), cutting manual reporting work.
- Support for the periodic client reports: processing and validation of economic data, charts and layout.
- Integration of generative AI into the team's work: research, content writing, data checking and script development.
- Development and maintenance of the corporate website and internal tools; involvement in the METIX digital project.
- Digital marketing: web and LinkedIn content, newsletters and Google Ads campaigns with a click-through rate close to 7%.

Web Development Intern (DAW)

2019-04 – 2019-06

Ciber Experis · Madrid

- Development and maintenance of web applications within a technology consulting team.

Systems Administration Intern (ASIR)

2018-04 – 2018-06

Tecnocom · Madrid

- Systems and network administration: installation, configuration and user support.

EDUCATION

Master's in Big Data & Business Analytics

2019 – 2020

Escuela de Organización Industrial (EOI), Madrid

Higher Vocational Degree in Web Application Development (DAW)

2017 – 2019

Cooperativa José Ramón Otero, Madrid

Higher Vocational Degree in Network Systems Administration (ASIR)

2016 – 2018

Cooperativa José Ramón Otero, Madrid

PROJECTS

Harford DnD 5e (World of Warcraft addon) github.com/Griker95/harford-dnd

Full tabletop RPG system inside the game, in Lua (800+ KB of own code): character sheet, resources, turn-based combat, loot and state synchronisation between players on a private server. Active personal project since 2026.

Lua WoW API client synchronisation

Harford Company web archive github.com/Griker95/harford-web

Framework-free static site: client-rendered records from JS data modules, custom lightweight markup, automatic deployment to Cloudflare Pages via GitHub Actions. 400+ commits. Live at harfordweb.marcos-pazos-95.workers.dev.
